Accident Investigation

This training session aims to equip workers and supervisors with strategies to investigate incidents so future incidents can be avoided. This training program will teach students the methods and the legislative requirements for conducting effective accident investigations. Employers, supervisors, and workers who may be involved in accident investigation after a workplace incident will find this course beneficial.

Course Content Covers:

- Purpose of Accident/Incident Reporting
- Legislative requirements (O. Reg. 420)
- Critical Injuries and Fatalities
- Near Misses
- Steps in Accident Investigation
- Accident Causation Theory
- The Accident Investigation Report

ACUTE Courses Are:

- Facilitated by experienced instructors
- Interactive and engaging
